Erratum: Patchy promiscuity: machine learning applied to predict the host specificity of *Salmonella enterica* and *Escherichia coli*

Nadejda Lupolova,¹ Tim J. Dallman,² Nicola J. Holden³ and David L. Gally^{4,*}

Microbial Genomics 2017;3, doi: 10.1099/mgen.0.000135

An error occurred during the publishing process of this article.

There was text inserted in the final paragraph of the Discussion, in the following sentence:

‘We consider that machine learning has tremendous potential to interrogate complex seqLineColumnRule IDProbe Message-Node TextNode XpathParent Node Textfatal/var/www/html/_default/resources/microbio/__package/144333/144333.xmlf002block-formatting check: Entire content of title should not be formatted (Tagging Guidelines)Salmonella entericaence datasets and identify genes/sequences associated with host specificity.’

The sentence should read as follows:

‘We consider that machine learning has tremendous potential to interrogate complex sequence datasets and identify genes/sequences associated with host specificity.’

The Microbiology Society apologizes for any inconvenience caused.
